Hey Nathaniel,

In the email I got from Mrs. Anger, it said to contact you asap so here it is. My name is Noah, And I live in Rossville, Indiana; I am in the eighth grade at Lafayette Christian School. Now to the collaboration project, I was wondering which collaboration project you wanted to do; I was reading over the chapter 4 collaboration, and it seemed pretty interesting. It it you have to design an Eco-friendly house with a limited amount of money. It seems more fun than the other options for collaboration.

Noah V.

That sounds pretty good to me. Should I just create a google docs document and we can both contribute to it?

Yeah, that sounds pretty good. We could research ways to make the house more Eco-friendly and contribute to the project when we find anything good.

Hey sorry I haven't replied. I am in module 2 but she said I could work on any module for the project. Do you have discord so we could chat using that or should we just text or What? Or we could use google hangouts. Thanks.

Ok, in the email she said it wasn't very clear about the due date, but I think its the date when the module 3 collaboration is due in your grade book. I do have discord, and hangouts is easy, but we can do whatever is most convenient. I think we should start researching, so when we do talk, however it may be, we have something to share.

Noah

Hey, When do you want to start collaborating? I just had a DBA with Mrs. Anger and she said I need to have this done before my final exam, which is due Friday. There is a two week grace period, but I'd rather not dig too deep into that and get farther behind in the rest of my course. If we could try and finish this up soon it would be great. Also, how was it you wanted to talk?
